At Sienna Homes, we offer the highest quality inclusions and incredible choice.

Buying a new home is complex, even bewildering at times. How do you compare apples with apples, or more importantly spot a lemon?

At Sienna Homes we believe we offer much more than apples. The reasons are simple, we understand good design and the importance of using space and light well. We operate a tight ship, so there are no exorbitant marketing budgets pushing up the price of your new home. But equally importantly, we offer a really impressive range of inclusions.

This guide has been put together to give you a feel of what you get in your new home. We like to think that it shows not only the quality of our inclusions but also the great breadth of choice you get when selecting upgrades for your home. **We use quality brands like Austral Bricks, Daikin, Colorbond & Polytec.**

This is not a complete list, more a sample of key inclusions and upgrades, your New Home Consultant will be happy to discuss the full breadth of inclusions and upgrades on offer.

STIEBEL ELTRON

Stiebel Eltron Australia is a market leader in sustainable heating, cooling, and renewable energy solutions, renowned for quality and energy-efficient technologies.

James Hardie Australia is a leading global manufacturer, known for its durable and high-quality fibre cement building products for residential and commercial use.
